

OPTIMAL®

CABIN FILTERS

A safe ride also means having clean cabin air. Dust, soot and pollen reduce air quality, spoiling the pleasure of a good journey. The OPTIMAL cabin air filter range provides:

- Particle or carbon-activated version of your choice
- Efficient filtration of air pollutants
- Constant filtration performance lifespan
- Condensation prevention
- Clean cabin air
- Quick and easy installation

Particulate cabin filters:

- Capture microscopic particles
- Provide a solid structure against mechanical deformations

Carbon-activated cabin filters:

- Absorb harmful gases
- Eliminate unpleasant odors
