

OPTIMAL®

FUEL FILTERS

Engine performance can only be guaranteed when fuel is clean and free of impurities. Our OPTIMAL fuel filters provide:

- Top-class filtration of fuel contaminants
- High-efficiency water particle separation
- State-of-the-art filtration media
- Protection of sensitive fuel system parts
- Tailored filtration performance according to engine type

Inserted fuel filters feature:

- Designs specifically for modern diesel engines
- High-temperature resistant polymers
- High-filtration technology

In-line fuel filters feature:

- High-grade polymers and steel
- Tailored to meet vehicle specifications

Spin-on fuel filters feature:

- Highly deformation-resistant and damage-proof steel
- High-quality sealing rings to prevent fuel leaks
- Sizes made to fit specific car models
