

Control arms for VW Polo 6N1, VW Polo 6N2, VW Lupo and SEAT Arosa

It is important to identify the correct part

This Technical Tip shows you why the original rim size, the chassis number and the PR code are important for identifying steering and suspension parts for certain uses. The examples provided below show how to identify the right complete control arm for use in various SEAT and VW vehicles. The side on which the ball joint is installed varies depending on the brake system.

VW Polo 6N1:

Control arm including pre-assembled ball joint:

Article number	Installation position	Original rim size	Brake disc diameter Ø
G6-2100	Left	13"	239 mm
G6-2101	Right	13"	239 mm
G6-2102	Left	14"	256 mm
G6-2103	Right	14"	256 mm

Control arm without pre-assembled ball joint:

Article number	Installation position	Original rim size	Brake disc diameter Ø
G6-659	Left/Right	13" or 14"	239 or 256 mm
